Davide Silvagni, PhD candidate at IPP, Germany

## The I-mode confinement regime

**Title:** The I-mode confinement regime, a reactor relevant scenario?

**Speaker:** Davide Silvagni, PhD - Max Planck Institute for Plasma Physics, Garching (Germany) 

**When:** 2020-01-30 18:00:00

**Abstract:** The I-mode is a promising ELM-free operational regime for magnetically confined fusion reactors. In this talk the main features of I-mode plasmas will be presented, along with the remaining open scientific questions to prove its compatibility with a DEMO-like reactor.
