FusionEPTalks

Title. The i-mode commement regime, a reactor relevant scenario:

Speaker: Davide Silvagni, PhD - Max Planck Institute for Plasma Physics, Garching (Germany) **Fusion**

When: 2020-01-30 18:00:00

Abstract: The I-mode is a promising ELM-free operational regime for magnetically confined fusion reactors. In this talk the main features of I-mode plasmas will be presented, along with the remaining open scientific questions to prove its compatibility with a DEMO-like reactor.
